PORT HAMBURG TERMINAL

■ CASE

Hoffland Sloopwerken en Metaalhandel, a company specialized in the demolition of industrial infrastructures and the recycling of metal, demolished an entire tank terminal in the port of Hamburg for one of her partners. On behalf of Hoffland, we handled and processed the non-metal waste, like soil, isolation, debris, hazardous waste, plastic and wood.

■ DECISIVE FACTORS FOR THE CUSTOMER

- Envigroup's network in Germany,
- Speed of waste removal,
- Clear and proper administration which was necessary for the communication with the client and the local authorities,
- Possibility of quick anticipation of unforeseen circumstances

■ IMPORTANT FACTORS

- Location had to be delivered completely empty
- A select group of collectors is allowed and able to work in the port of Hamburg
- Project had to be controlled from a distance

■ EXPLANATION PROJECT

The target of this project was making it possible for bigger ships to enter the port of Hamburg.
